

# Borrelogen™

Jernigan Nutraceuticals

---

Size: 4oz. / 120 mL  
Bottle dosage: 1 dropper, 3 times per day  
Droppers per bottle: about 140

Borrelogen is a frequency-matched botanical formula specifically tailored to provide the body with the bioinformation needed to facilitate the body's own energetic antimicrobial control mechanisms. Borrelogen was frequency matched to address the body's needs to deal with multiple strains of *Borrelia burgdorferi*, both U.S. and European. It factors in the many pleomorphic phases, such as cystic or Lform. Also factored into this one remedy are the common coinfections, such as *Babesia microti*, *Ehrlichia*, and Rocky-Mountain Spotted fever. The independent laboratory testing of Borrelogen conclusively demonstrated its Lyme antigen-releasing ability to be far superior to any commonly seen with antibiotic therapy. (Lyme antigens are the dead pieces of *Borrelia* bacteria appearing and counted in urine.) This research on Borrelogen is provided in Appendix G. Borrelogen was also tested by an independent pharmaceutical laboratory to be non-toxic up to 150 times the maximum recommended dosage. This "Acute Oral Toxicity" test was performed by Toxicon Laboratories, in Bedford, Massachusetts, on male and female rats, following standardized FDA protocols.

## Perfect-7 Protocol Borrelogen Dosage:

- Teens-Adults: Squeeze 1-2 droppers (one dropper = one squeeze) of Borrelogen under the tongue, swish it around the teeth, and swallow, 3 times per day with or without food.
- 7-12 years of age: use 1 dropper, 2-3 times per day.
- Use 10 drops, 2-3 times per day for children under 6 years of age. Always consult your natural health professional before starting any child on any herbal formula.

Borrelogen contains the below botanical ingredients, each of which is added to the formula based upon Bio-Resonance testing, instead of based upon a plant's known actions or historical uses. "Flat-earth" herbalists will likely be confounded by this formula since very few of the herbs in this formula have any direct antibiotic effect. Remember, it is the cumulative frequency spectrum that works to restore the body, not to "bomb" the bacteria, which never works.

If taken as directed within the Perfect-7 protocol, virtually no Herxheimer reaction should be expected, even by ex-

tremely sensitive people. However, sensitive individuals may want to work up the recommended dosage, starting with only a few drops to see how your body reacts before increasing the amount. If you feel worse, your organs of elimination likely are not working well and need to be supported. This is why it is important to follow the detoxification recommendations outlined in Step 2 of Dr. Jernigan's Perfect-7 Treatment and Detoxification Protocol™.

If you are feeling worse upon starting any appropriate and effective Lyme treatment, it is likely due to the increased movement of Lyme toxins from bacterial die-off. This problem is often remedied by significantly increasing your dosage of Neuro-Antitox II Formula™, which should always be taken with Borrelogen, in order to break down and bind up more of these toxins. Incorporating all of the steps in the detoxification part of the Perfect-7 Protocol will greatly minimize aggravating symptoms from increased toxins and weakness in the tissues of the body. The less Lyme toxins you have, the fewer symptoms you should experience. Of course, there remains the possibility with all drugs and all natural remedies that a true allergic reaction may be occurring if you feel very poorly during a treatment. Only a trained health care professional can determine if what you are experiencing is an allergic reaction, drug toxicity reaction, or if the aggravation is from weaknesses in the organs of elimination.

**Borrelogen ingredients:** *Phragmites communis* rhizome, *Morus alba* leaf, *Baptisia bractiata*, Fiddle-leaf fig folium, *Chrysanthemum moritolum* flower, *Platycodon grandiflorum* root, *Prunum armeniaca* kernel, *Glycyrrhiza uralensis* root, *Baptisia australis*, *Mentha hapocalyx*, *Ophiopogon tuber*, *Una-de-gato*, *Morus rubra* fruit, *Cuscuta*, *Scindapsis aureus*, *Ipomoea quamoclit*, *Dracaena dermensis*, Crystal Clear™ distilled water and 20% pharmaceutical grade alcohol.

All suggested supplements are our best recommendation and never should be considered a prescription. These statements have not been evaluated by the FDA. The product(s) mentioned on this page are designed to improve the functional performance of the human body, and are not intended to diagnose, treat, cure, or prevent any disease. Always consult your own personal physician before beginning any prescription medications, natural supplement, or treatment program, especially if you are pregnant or nursing.
