

Neuro-Antitox II Basic™

Jernigan Nutraceuticals

Size: 4oz. / 120 mL
Bottle dosage: 1 dropper, 3 times per day
Droppers per bottle: about 140

The **Basic** formula is good for global detoxification of the Lyme toxins, heavy metals, and for those who are unsure which specific Neuro-Antitox II™ Formula to take. This formula does not contain any sarcobioenergetic potencies.

The chief ingredient in all of the Neuro-Antitox II™ formulas is a novel use botanical, Silphium laciniatum. Out of 5000 different natural botanicals, minerals, nutraceuticals, and pharmaceuticals tested using Bio-Resonance Scanning™, Silphium tested superior to them all for detoxifying the Lymespecific neurotoxins. The Neuro-Antitox II™ formulas also contain the next best substance identified as a synergistic (supportive) botanical along with the Silphium, Pale -- Spike Lobelia. The only difference between the Musculo-Skeletal, and CNS/PNS formulas is the use of Sarcobioenergetic Potencies™, which may act as driving agents (to direct the Silphium and Pale Spike to the specific tissues where they are needed, instead of just circulating around the body randomly).

The **Basic** formula does not have any of these Sarcobioenergetic Potencies™ and is therefore good when you are not sure which formula you need, or for more global symptoms.

The combined effect of these key ingredients makes the Neuro-Antitox II™ Formulas an absolute necessity in any wellrounded treatment plan.

To minimize any Herxheimer reaction, I recommend that Neuro-Antitox II™ dietary supplement be taken for at least one week before beginning any antibiotic or other medical/alternative treatment. Remember, Herxheimer reactions are caused by toxins, and the Neuro-Antitox II™ Formulas are designed to mop up, bind up, and break down these Lyme-related toxins to eliminate any adverse reactions to the Lyme bacteria die-offs.

Besides Silphium laciniatum's function as an amazing anti-neurotoxin, it was successfully used in times long passed to treat various cancers, all forms of asthma, and bronchitis, and it was effective in breaking down mucus in the tissues. Resonance testing reveals that Silphium may also bind heavy metals and break down isopropyl alcohol and benzene accumulations, adding to its phenomenal arsenal of beneficial effects.

Overall detoxification can be supported by simply drinking eight ounces of purified water every hour to keep the everyday metabolic toxins flushed out of the tissues. Some patients have difficulty drinking water, so putting fresh lemon juice or Ningxia Red™ wolfberry juice in the cool (but not cold) water makes it easier to drink more water per day.

As a general recommendation, take 1-2 droppers, 2-3 times per day, with or without food. It may be that you have to use more than one formula if there are problems in multiple areas, in which case 1-2 droppers are recommended from each corresponding Formula.

Perfect-7 Protocol Dosage:

- Teens-adults: Take 1-2 droppers under the tongue, 2-3 times per day, 10 minutes away from food or drink
- 7-13 years of age: 1 dropper, 2 times per day.
- Use 10 drops, 2-3 times per day for children under 6 years of age. Always consult your natural health professional before starting any child on any herbal formula.

Ingredients: Silphium laciniatum aerial extract and Pale Spike Lobelia aerial extract, Crystal Clear™ Distilled Water, and 20% pharmaceutical-grade alcohol.

All suggested supplements are our best recommendation and never should be considered a prescription. These statements have not been evaluated by the FDA.
